DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-6, 15, 16, 18, and 19 are rejected under 35 U.S.C. 102(e) as being anticipated by Kalkunte et al. (U.S. Patent 6,078,591).

Kalkunte et al. discloses the invention (**claims 1, 15, 16, 18, and 19**) as claimed including a method for a PHY to resolve link frame collisions, the method comprising:

- (i) attempting to transmit a link frame if the PHY has not transmitted a frame in the last x second, where x is a positive real number (see Fig. 2a, col. 6, lines 33-36).
- (ii) if a frame collision is detected during step (i), attempting to transmit a link frame at a time interval after the last frame transmission attempt of the PHY has ended (see Fig. 2A, col. 6, lines 41-52).

Art Unit: 2661

Regarding claims 2 and 5, Kalkunte et al. discloses (iii) repeat limitation (ii) each time a frame collision is detected until the number of link frame transmission attempts since the occurrence of limitation (i) equals a specified limit (see Fig. 2A, col. 6, lines 41-52).

Regarding claims 3 and 6, Kalkunte et al. discloses (iv) if in performing limitation (iii) the number of link frame transmission attempts since the occurrence of limitation (i) equals the specified limit, performing limitations (i) and (ii) upon allowing a random interval of time to elapse after the last link frame transmission attempt of the PHY has ended (see Fig. 2A, col. 6, lines 22-24, 33-35, 41-52).

Regarding claim 4, Kalkunte et al. discloses wherein the time interval is an Inter Packet Gap (IPG) (see Fig. 2A, col. 6, lines 22-24, 33-35).

Allowable Subject Matter

3. Claims 7-14 are allowed.
4. Claims 17 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments with respect to claims 1-6, 11-13, 15, 16, 18, and 19 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 2661

Conclusion

6. Any query concerning this communication or earlier communications from the examiner should be directed to the examiner, Phirin Sam whose telephone number is (703) 308 – 9294. The examiner can normally be reached on Monday – Friday from 8:30AM – 4:00PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Douglas W. Olms can be reached at (703) 305 – 4703. The fax number for this group is (703) 872 – 9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305 – 4700.

Respectfully submitted,
